LW Measurements offers LC-VS series at an affordable price point that is consistent with the Tree Brand quality

We source our materials carefully, like unbreakable tempered glass on the LC-VS 60 and LC-VS 330, ABS plastics on LC-VS 400 to reduce cost and increase accuracy. The health of your pets, furry to feathery is important to all of us.

Our scales are designed for you and your efficiency needs.

Scales' accuracy can change over time. LC-VS series are manufactured with unique AnyCAL software that allows you to calibrate the scale without test weights. The three different models provide max capacities of 60lb x 0.02lb, 330lb x 0.1lb and 400lb x 0.1lb.

Tempered glass for easy cleaning (LC-VS 60/330).

The tempered glass is the same spec as your cars' windscreen is easy to clean and sanitize. It is many times stronger than regular glass and resists shattering. Comes standard with a protective rubber mat.

Button Design.

All the buttons are strategically placed beneath on the front of the scale where water will not access into the electronics. They can be seen and easily access when scales are on bench level or access with a light tap with our shoes on the floor.

Convenience, portability, and capability are important.

Each scale is provided with AC power Adapters and rubber protective mats. The LC-VS 400 has adjustable feet, and wheels and printer or computer interface capabilities. The LC-VS 400 comes with a Remo indicator that is factory set for the specific capacity of this scale model. The LC-VS 60/330 has the optional remote indicator that allows the second display to be mounted at eye level (sold separately). All three scales models have the ability for portability by being able to run off batteries as well.

Compact and capable…

The LC-VS 60 and 330 models are low profile, elegant in design and small enough to set on a counter or big enough to be placed on the floor. Standard with an AC power supply or batteries and a port for optional remote indicator.

AC adapter port

Remote Indicator connection port

LCVS 60 and 330 remote indicator (sold separately)

Caster wheels

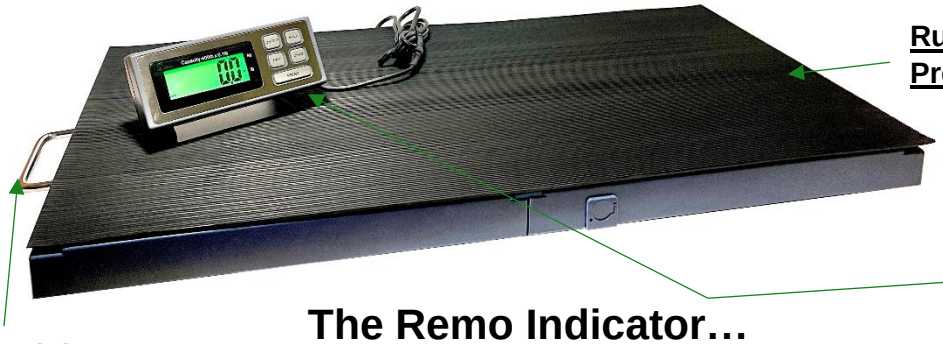

Versatile and maneuverable…

Adjustable feet on the bottom are threaded into the scale body. Caster wheels offer portability. A stainless-steel handle that is connected to the steel frame allows for mobility.

Sturdy materials to weigh big and small livestock and pets.

The materials we use in the manufacturing of our scales are chosen with you in mind to build an affordable product without sacrificing quality, durability, and accuracy. Whether it be the tempered glass on the LC-VS 60/330, the plastic base over the steel frame on the LC-VS 400 or any of our products that use stainless steel, and aluminum. Our standards for the materials handpicked by our company is high and we don't settle for less. Because neither should you.

Rubber Protective Mat

Stainless Steel handle

The Remo Indicator…

Allows for easy readability and functionality. Hold, Zero, Tare, and Print at the press of a button. Even the ability to connect a printer or to a computer.

Accessories sold separately	Wired indicator (sold separately)		None

Warranty

The products are under warranty against factory defects for a period of two (2) years from the date of shipment.

For Customers within the lower 48 states of the continental United States. LW Measurements will pay for fright both ways for the first 30 days after purchase. After 30 days expire the customer is responsible for shipping the product back to us. After the product is received, we will inspect it and as necessary we will repair or replace and will ship the product back to the customer at our expense.

Any new scales returned for warranty must be properly packaged in the original box. If they are not properly packed an in the original box, the customer pays for shipping cost. If we determine there is a factory defect, we will pay for the shipping back. If we determine that it is not a factory defect, the customer will pay shipping.

For Customers outside the lower 48 States, including Mexico, Canada, Puerto Rico, Hawaii, Alaska and all other countries, customers must pay for shipping.

Our warranty does not cover misuse or neglect including but not limited to battery or water damage, overloading, and chewed or cut wires. If the product is found to have been misused or damaged by the customer, LW measurements is not responsible for the cost of return.

For warranty claims please go online to lwmeasurements.com and fill out the warranty submission form or call your customer service representative.
